

To the Parkview Colony (Congregation)  
Announcing the grand opening of  
**STUDIO BEE**

and the start of bee swarm capture season 2023

March 18 (Sat) 2023, 10:00 AM

Location the Carriker's (jct Hwy 7 and US Hwy 50)

There has been considerable time, effort and resources spent to create a bee servicing room which will provide support for colony and hive management as well as honey extraction and bottling, etc. You are invited to an open tour of this facility and are welcome to frequent the site in the future.

The grand opening will consist of a short tour, a touch-up of the existing swarm capture boxes for this year, and a luncheon. In the afternoon, weather permitting, we will distribute and hang the swarm capture boxes and set up a few large permanent colony boxes.

If you have questions, suggestions for lunch offerings or special dietary needs, or just want to talk bees, feel free to call Neil at (816) 223-5978. If you get no answer, please leave a message as Neil does not answer calls from unknown numbers (try not to be offended).
